DRINKING WATER REINVENTED

OUR MISSION

Perfecting water for every person, every place and committed to the SDG Goal “CLEAN WATER”

MAJOR BARRIERS TO DRINKING WATER

ACCESS

60% of people lack safe water at home globally

CONTAMINATION

Microplastics, PFAS, lead, arsenic E.coli, coliform, and other pollutants compromise water safety

RELIABILITY

Major water supplies are threatened by drought and natural disasters

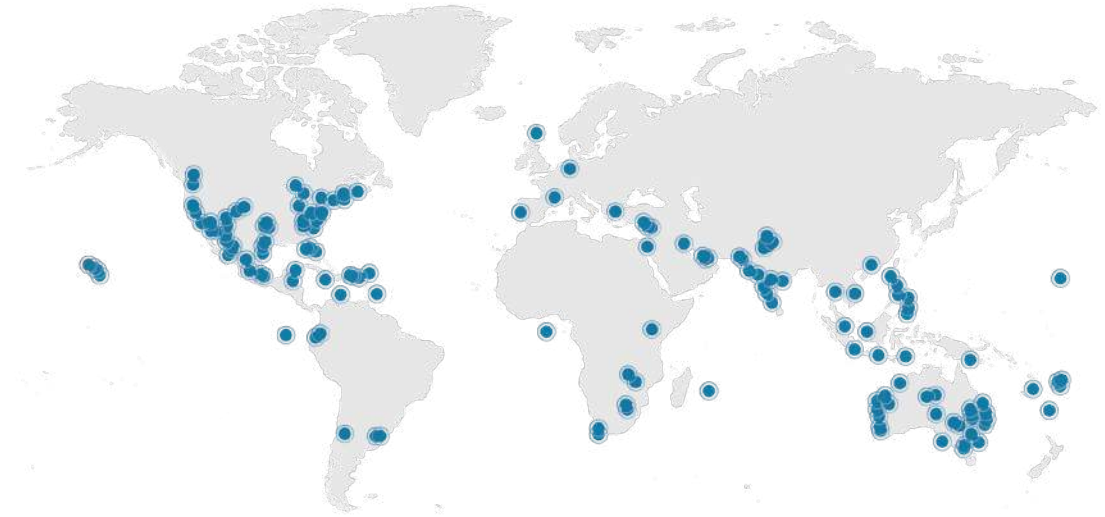

COST & WASTE

Over half a trillion of costly plastic bottles were sold in 2020 - 85% of all plastic is not recycled

OVER 48 COUNTRIES & COUNTING

SOURCE produces water in a variety of climates, from very humid to very dry

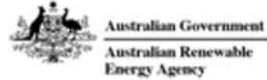

OUR PARTNERS

Solidaridad

ASU Arizona State University

SOURCE Drinking Water Solutions

BAHIA HONDITA COMMUNITY

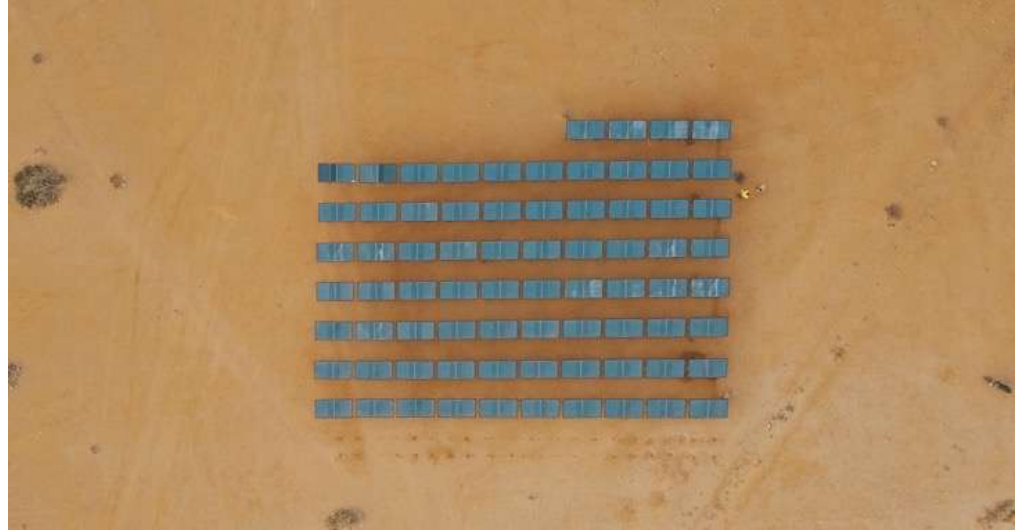

Bahia Hondita, Colombia

CHALLENGE

Cut off from the rest of the country with no roads or infrastructure, members of the Wayuu tribe needed access to safe, secure drinking water despite the remote nature of their community

SOLUTION

In partnership with Conservation International, ZMW installed two community-scale Hydropanel arrays in Bahia Hondita

UNIVERSITY HOSPITAL OF THE WEST INDIES

Kingston, Jamaica

CHALLENGE

Environmental changes in the Caribbean due to climate change have left communities in Jamaica without reliable options for drinking water access. As a result, Jamaicans often turn to bottled water, contributing to the nations plastic waste troubles.

SOLUTION

The Caribbean Climate-Smart Accelerator and ZMW partnered to install SOURCE at the hospital, providing up to 3,000 liters of resilient, waste-free drinking water each month.

PLATINUM HERITAGE DESERT SAFARIS

Murqab, Dubai, UAE

CHALLENGE

Platinum Heritage sought a solution to providing high-quality water to their guests while avoiding the water wasted in filtration and the packaging of bottled water.

SOLUTION

Platinum Heritage purchases SOURCE Water from the SOURCE Field located at their desert safari camp and can now shift their focus to advancing other green initiatives all while providing guests a memorable and sustainable experience.
