  - (a) Supporting the organization in fulfilling its normative role;
  - (b) Providing a dialogue mechanism between the public and private tourism stakeholders and the academia within a coherent framework to give guidance in building and strengthening tourism competitiveness policies and strategies;
  - (c) Building synergies and strategic alignments in the harmonization of the related activities of the Secretariat as well as other collaborating organizations/entities to ensure consistency and consensus in the delivery of the outputs and reinforce the official position of the Organization.
4. At the initial stage of its work, CTC is decided to assess the state of knowledge on the existing data and initiatives at national and international levels on the basic concept of “tourism competitiveness” and to identify its key determinants. This process also includes identifying, developing and harmonizing concepts, models and operational definitions used in the tourism value chain within a hierarchical structure, from general to the specific. This will lead to a validation process to reinforce the normative role of the Organization while the technical outputs and recommendations can be used by the UNWTO members for different purposes such as measuring, labelling and/or benchmarking.

### III. Working process of the Committee:

5. The CTC held its first presential meeting in Victoria Falls, Zimbabwe, on 25 August 2013. The deliberations of the 1<sup>st</sup> meeting mainly focused on the mandate, composition and possible work areas.
6. The first virtual meeting took place at the UNWTO Headquarters in Madrid on 27 March 2014. It was decided to start the work of the Committee by collecting and assessing the state of knowledge in the field of tourism competitiveness at national and international levels. The first report of the CTC was submitted to the 98<sup>th</sup> session of the Executive Council (Santiago de Compostela, Spain, June 2014) (CE/98/3(l)(e)).
7. After the presentation of the first report of the CTC to the Executive Council, the Committee held two virtual meetings, on 3 July 2014 and on 22 October 2014, respectively, and one presential meeting at the UNWTO Headquarters on 28 January 2015, on the occasion of FITUR.
8. Based on the debate during the 2<sup>nd</sup> virtual meeting of the CTC (3 July 2014), the UNWTO Secretariat initiated the work of analysing a variety of existing definitions of the basic concept “tourism

competitiveness” and its key determinants which resulted in the preparation of a **Draft Working Document**. This paper was shared with the CTC Members for further comments and observations in September 2014 prior to the 3<sup>rd</sup> virtual meeting.

9. The definitions presented in the paper were reviewed at the 3<sup>rd</sup> virtual meeting (22 October 2014) and a few amendments were made. The exercise once again confirmed the complexity of the task due to a variety of purposes and cross-cutting areas within the given context of the definition. Therefore, it was decided to circulate a Questionnaire to the CTC Members in order to reach a general consensus.

10. The Questionnaire was circulated in November 2014 and the UNWTO Secretariat submitted the recommendations to the presential meeting of the CTC held at the UNWTO Headquarters in Madrid on 28 January 2015.

#### IV. Overview:

11. It is very important for the policy makers and destination managers to clearly understand the complex and multi-faceted factors that affect tourism competitiveness. Nevertheless, these factors are quite dynamic and can change very rapidly at national and sub-national level due to the macro (global) and micro external / internal variables.

12. Many tourism destinations together with the tourism researchers seek to develop models of competitiveness and a set of measurable indicators to allow them to identify the relative strengths and weaknesses of the destination and guide them in policy setting and strategic planning.

13. Along with the studies and work conducted at regional and local levels within this context, there are global initiatives carried out by international organizations, such as the World Economic Forum (Travel and Tourism Competitiveness Report) and OECD (Indicators for Measuring Competitiveness in Tourism). UNWTO sees considerable benefit in co-operating with these organizations to develop a general framework for the determinants of destination competitiveness.

14. In addition to this global knowledge building framework, due to the relevance of its mission as the leading intergovernmental organization for tourism, UNWTO provides technical guidance and expertise to its members so that the destinations can identify their core indicators for the assessment and measurement of their tourism competitiveness over time.

15. The process of setting uniform criteria for definitions related to tourism is not an easy task given the fact that it is a very broad and complex sector which involves a wide range of cross-cutting areas. Each stakeholder or actor involved in the tourism sector may define the related concepts from a different perspective by highlighting the features that better suit their purpose and interests. Moreover, definitions tend to change with time acquiring new connotations based on the changing reality.

16. As a reference, the work the UNWTO has conducted, with the support of numerous partners, in elaborating tourism terminology and definitions basically for statistical purposes, is widely known. The glossary of tourism terms prepared within the framework of the International Recommendations for Tourism Statistics 2008 (also known as IRTS 2008) is a globally accepted initiative. The IRTS 2008 provides the main concepts, definitions and classifications for the measurement of tourism in a standard way across countries; however, due to its nature, it is primarily oriented to the staff of national statistical offices and national tourism administrations involved in the compilation of tourism statistics.

## V. Provisional definitions:

17. As an outcome of the work of the CTC, the following provisional definitions have been elaborated and will be subject to further observations in seeking final consensus.

- (a) **Tourism Destination:** The following definition is based on the initial definition of “Tourism Destination” which dates back to 2002 as a result of the work of the WTO Think Tank on Destination Management (Madrid, Spain).

***A Tourism Destination*** is a physical space with or without administrative and/or analytical boundaries in which a visitor can spend an overnight. It is the cluster (co-location) of products and services, and of activities and experiences along the tourism value chain and a basic unit of analysis of tourism. A destination incorporates various stakeholders and can network to form larger destinations. It is also intangible with its image and identity which may influence its market competitiveness.

- (b) **Destination Management/Marketing Organization (DMO):**

***A Destination Management/Marketing Organization (DMO)*** is the leading organizational entity which may encompass the various authorities, stakeholders and professionals and facilitates tourism sector partnerships towards a collective destination vision. The governance structures of DMOs vary from a single public authority to a public/private partnership model with the key role of initiating, coordinating and managing certain activities such as implementation of tourism policies, strategic planning, product development, promotion and marketing and convention bureau activities.

The functions of the DMOs may vary from national to regional and local levels depending on the current and potential needs as well as on the decentralization level of public administration. Not every tourism destination has a DMO.

- (c) **Tourism product:**

***A Tourism Product*** is a combination of tangible and intangible elements, such as natural, cultural and man-made resources, attractions, facilities, services and activities around a specific centre of interest which represents the core of the destination marketing mix and creates an overall visitor experience including emotional aspects for the potential customers. A tourism product is priced and sold through distribution channels and it has a life-cycle.

- (d) **Tourism Value Chain:**

***Tourism Value Chain*** is the sequence of primary and support activities which are strategically fundamental for the performance of the tourism sector. Linked processes such as policy making and integrated planning, product development and packaging, promotion and marketing, distribution and sales and destination operations and services are the key primary activities of the tourism value chain.

Support activities involve transport and infrastructure, human resource development, technology and systems development and other complementary goods and services which may not be related to core tourism businesses but have a high impact on the value of tourism.

- (e) The definition of **Quality of a Tourism Destination** represents a combination of the definition proposed by the former UNWTO Quality Support Committee at its sixth meeting (Varadero, Cuba, 9-10 May 2003) and the inputs of the CTC.

***Quality of a Tourism Destination*** is the result of a process which implies the satisfaction of all tourism product and service needs, requirements and expectations of the consumer at an acceptable price, in conformity with mutually accepted contractual conditions and the implicit underlying factors such as safety and security, hygiene, accessibility, communication, infrastructure and public amenities and services. It also involves aspects of ethics, transparency and respect towards the human, natural and cultural environment.

Quality, as one of the key drivers of tourism competitiveness, is also a professional tool for organizational, operational and perception purposes for tourism suppliers.

- (f) **Innovation in Tourism:**

***Innovation in Tourism*** is the introduction of a new or improved component which intends to bring tangible and intangible benefits to tourism stakeholders and the local community, improve the value of the tourism experience and the core competencies of the tourism sector and hence enhance tourism competitiveness and /or sustainability. Innovation in tourism may cover potential areas, such as tourism destinations, tourism products, technology, processes, organizations and business models, skills, architecture, services, tools and/or practices for management, marketing, communication, operation, quality assurance and pricing.

- (g) **Competitiveness of a Tourism Destination:**

***The competitiveness of a Tourism Destination*** is the ability of the destination to use its natural, cultural, human, man-made and capital resources efficiently to develop and deliver quality, innovative, ethical and attractive tourism products and services in order to achieve a sustainable growth within its overall vision and strategic goals, increase the added value of the tourism sector, improve and diversify its market components and optimize its attractiveness and benefits both for visitors and the local community in a sustainable perspective.

18. In addition to the above-mentioned definitions, the Secretariat elaborated a list of quantitative and qualitative factors for destination competitiveness to be further discussed with the CTC Members under 2 categories:

- (i) Factors related to governance, management and market dynamics;
- (ii) Factors related to destination appeal, attractors, products and supply.

19. The Secretariat will also work on harmonizing further definitions, such as tourism image, tourism brand, accessibility, accommodation types, tourism typologies( i.e. urban/city tourism, ecotourism, rural tourism, coastal tourism, cruise tourism, adventure tourism, cultural tourism, religious/spiritual tourism, wellness/spa tourism, medical tourism, mega-events tourism, meetings industry etc.)

#### **VI. Cooperation with ISO and AENOR (Spanish Association for Standardization and Certification and representative of the ISO Technical Committee)**

20. The Secretariat boasts fruitful cooperation with ISO through AENOR (Spanish Association for Standardization) to mutually adopt the already elaborated definitions which are on the working agenda of ISO Technical Committee 228 for related standards and forms.

## Anexo II. Informe del Comité de Turismo y Sostenibilidad

1. As stipulated in the Rules of Procedure of the Committee on Tourism and Sustainability (CTS), entities and individuals may be invited to participate in the activities of the Committee on an ad-hoc basis. A list of invited participants for the different thematic areas is enclosed for submission by the UNWTO Secretary-General to the Executive Council for approval.

2. Through an official letter sent to the Secretariat on 17 December 2014, Lithuania expressed the wish to participate, as observer, in the meetings of the CTS.

3. The **fourth meeting** (virtual) of the Committee on Tourism and Sustainability took place on 18, February 2015, with the participation of representatives from Bahamas (Chair), Israel (Vice-Chair), Islamic Republic of Iran and Seychelles. During the meeting, the Secretariat provided an update on major developments since the previous meeting:

a) **[UN General Assembly Resolution 69/233 on “Promotion of sustainable tourism, including ecotourism, for poverty eradication and environment protection”](#)**: The Committee Members and their respective Missions to the UN in New York supported and engaged in the development and sponsorship of the milestone resolution entitled “Promotion of sustainable tourism, including ecotourism, for poverty eradication and environment protection” that was endorsed by 107 Member States and adopted by consensus by the sixty-ninth Session of the United Nations General Assembly (A/RES/69/233).

b) ***Observatory on Sustainable Tourism under the auspices of the World Tourism Organization (UNWTO) - Operations and Management***: In response to the growing demand by tourism organizations and stakeholders for a more systematic application of monitoring, evaluation and information management techniques and as a follow-up to the first UNWTO Conference on the Global Observatories of Sustainable Tourism, a review paper on the operations and management of the Observatories of Sustainable Tourism was prepared by the Secretariat and shared with the Members of the Committee.

c) ***Improving evidence-based decision making in the tourism sector. A review of the current discussions of measurements of sustainable development indicators for enterprises***: When researching the issue of evidence-based decision making related to sustainable indicators, inconsistencies at the implementation and data aggregation level were identified as a major challenge. Thus, research was conducted and resulted in the paper “Improving evidence-based decision making in the tourism sector” presented for discussion at the Statistical workshop of OECD and UNWTO that took place in Nara, Japan (17-21 November 2014). The document reviewed existing and utilized metrics and strategies at the enterprise level, based on Corporate Social Responsibility reports produced by frontrunners in the accommodation industry. This paper enabled the discussion on concepts, methods and data compilation to support the development and harmonization of statistics on sustainability in tourism and the use of quality data in order to improve policy design and monitoring.

d) **[Sustainable Tourism Programme \(STP\) of the 10-Year Framework of Programmes on Sustainable Consumption and Production \(10YFP\)](#)**: The CTS Members were updated on the relevant meetings and developments which took place since the launch of the 10YFP STP, on 5 November, 2014 at the occasion of World Tourism Market, such as the first in-person meeting of the Multi-Stakeholder Advisory Committee (MAC) of the 10YFP STP, held in Madrid at UNWTO Headquarters, attended by nearly 2/3 of Members, as well as the public meeting of the MAC, “The Shift Towards Sustainable Consumption and Production Patterns”, which aimed to discuss

next steps of the 10YFP STP in an open debate within the framework of FITUR, Madrid 2015. The Committee Members were also informed on the development of the 10YFP STP Programme of Work, currently under formulation by the Lead and co-Leads in collaboration with the MAC, which is composed by 22 members representing governments, private sector, NGOs and academia.

4. Furthermore, the CTS Members were informed on the Briefing Paper "[Towards Measuring the Economic Value of Wildlife Watching Tourism in Africa](#)" prepared by the Secretariat. This Paper serves as a first step towards a more systematic measurement of the economic value of the wildlife watching tourism market segment in Africa and in defining the role of the tourism sector in the fight against poaching. "Towards Measuring the Economic Value of Wildlife Watching Tourism in Africa" builds on a survey of 48 African tourism and conservation authorities from 31 countries, as well as 145 international and African-based tour operators. The survey has been complemented with available statistics, case study reviews and in-depth interviews with governments and international organizations.

**Fifteenth meeting**  
UNWTO Headquarters, Madrid, Spain

13 -14 January 2015

**International Recommendations for Tourism Statistics 2008 Compilation Guide**

The final edited version of the Compilation Guide for Tourism Statistics will be submitted to the 101 session of the UNWTO Executive Council, and subsequently will be disseminated at the UNWTO General Assembly for general information to Member States.

**UN Post-2015 Development Agenda and UN resolution with regard to data**

In the framework of the UN post-2015 Development Agenda the UN General Assembly adopted in December 2014 the document "[Road to Dignity](#)" that reminds the whole UN system of its role of guiding and developing a comprehensive programme of action on data and indicators. Out of the 17 proposed Sustainable Development Goals (SDGs), goal 8, 12 and 14 refer to tourism, in particular target 8.9 (devise and implement policies to promote sustainable tourism) and target 12.b (develop and implement tools to monitor sustainable development impacts for sustainable tourism) will be of interest for UNWTO.

Committee underlined the relevance to develop measurable and manageable indicators to track progress in the Sustainable Development Goals (SDG) targets that mention sustainable tourism in particular following the latest UN resolution with regard to data. Indicators to measure tourism will focus on a national level; however indicators that measure regional differences could be developed.

**UNWTO Data Access**

The Committee on Statistics and TSA took note of the findings of the UNWTO data user needs survey. The committee encouraged UNWTO to increase efforts to cater for the needs of UNWTO data user, in particular for data analysis and for a user-friendly access. The committee also encouraged UNWTO to re-think its "pay for data" policy in view of UN policy and practice by other international organizations of "open data access".

**Monitoring of IRTS 2008 Implementation**

The Committee welcomed the first steps to monitoring the current state of implementation of the International Recommendations for Tourism Statistics (IRTS) 2008. UNWTO should continue working on improving insights from such monitoring. The Committee also welcomed the initiative to evaluate the Statistics Capacity Building Programme with a view to improve and adapt future capacity building programmes. The Committee supported the idea to collect TSA data on a regular basis.

**Sub-national measurement of tourism and INRouTe**

The committee welcomed the joint initiative proposed by UNWTO Statistics and TSA programme and The International Network on Regional Economics, Mobility and Tourism (INRouTe) to circulate the proposed Basic Glossary on Regional (Sub-national) Tourism for consultation first to the Committee

members and INRouTe associated partners. Once the Glossary will be revised the Committee supports the plan to launch a world-wide consultation process of the updated version.

The final version of the Basic Glossary will be part of the “Handbook of Regional Tourism” to be presented by INRouTe to UNWTO. This document, including proposed guidelines on a list of 20 topics mentioned in the UNWTO/INRouTe agreement, will be delivered by the end of the first half of 2016 for a world-wide consultation to be concluded by October 2016.

The Committee will be briefed in its next meeting about the status of progress made so far in the preparation of the “Handbook”

The Committee also requested the Secretary General to keep working in collaboration with INRouTe along the future programme of work of UNWTO 2016-2017 and in the coming years in order to guarantee the success of such an initiative focused on the measurement and analysis of tourism at the sub-national level.

## B. UNWTO Consulting Unit on Tourism and Biodiversity

### **Regional Project: Africa**

**Project Title: Briefing Paper “Towards measuring the economic value of wildlife watching tourism in Africa”**

**Duration: 1 February 2014 – 31 October 2014 / Launched at World Wildlife Day 2015**

**Objectives:** Set against the backdrop of the ongoing poaching crisis driven by a dramatic increase in the illicit trade in wildlife products, the briefing paper intends to support the ongoing efforts of African governments and the broader international community in the fight against poaching. Specifically, the paper looks at the wildlife watching market segment within the tourism sector and highlights its economic importance with a view to encouraging tourism authorities and the tourism industry to collaborate in strengthening anti-poaching measures and raising awareness of these issues among tourists.

### **Results achieved as of 30/10/2014**

- The briefing paper is based on a review of publications, economic data, case studies and other sources related to wildlife watching tourism; a survey among African tourism ministries and authorities; protected area and wildlife conservation agencies; international and African-based tour operators; as well as an exchange of experiences with international organizations working in the fields of nature conservation, tourism, sustainable development and fighting wildlife crime. **A total of 48 governmental institutions (tourism authorities and protected area and wildlife conservation agencies) from 31 African countries participated in the survey. The sample represents 63% of UNWTO African Member States. Additionally, a total of 145 tour operators selling trips to Africa from 31 different countries participated, 50% of which were tour operators mainly from Europe (generally the principal source market for Africa) and 50% were Africa-based tour operators.**
- The collaboration with the Convention on Migratory Species of Wild Animals (UNEP/CMS) for the preparation of the briefing paper is to be highlighted, especially for the key role that it played when establishing contact with protected area and wildlife conservation agencies.
- A first draft of the document was presented to the African Ministers of Tourism during the UNWTO Commission for African Member States celebrated in Luanda, Angola, on 28 April 2014. The participating Ministers encouraged UNWTO to continue taking action in the fight against poaching and agreed on the text of the Joint Statement.
- **The analysis identifies key economic indicators and characteristics of wildlife watching tourism in African countries, which assist in measuring the segment's economic importance and potential growth:**
  - a. Wildlife watching is a very important segment of tourism for most African countries, representing 80% of the total annual trip sales to Africa for the participating tour operators, with that share only increasing.
  - b. Wildlife watching tourism occurs mainly in protected areas; and nature, national parks and wildlife are considered the most important tourism assets for tourists travelling to Africa. The regions that are most visited for the purposes of experiencing wildlife watching tourism are East Africa and Southern Africa. Central and West African tourism authorities are committed to further developing this type of tourism.
  - c. Safari is the most popular kind of wildlife watching and is being offered by 96% of the participating tour operators. This is followed by bird watching, which is offered by 80% of the participating operators and seems to be combined frequently with other activities. In countries that are not considered classic safari destinations, the observation of great apes, marine wildlife and tracking of particular species are particularly important.
  - d. A typical wildlife watching tour involves on average a group of 6 people, lasts 10 days, has an average daily price per person of USD 433 and captures an additional USD 55 in out-of-pocket expenses per person, per day.

- e. There are numerous ongoing efforts being carried out by African governments to monitor data that could be useful in estimating the economic value of the wildlife tourism segment. Nevertheless, further improvements are needed as these efforts are often not consistent and commonly lead to inconclusive results.
- f. For the vast majority of the countries denoted in the paper, poaching is seen as a serious problem that has negative impacts on tourism that threaten the sector's long-term sustainability and its development opportunities. While a majority of protected area authorities are involved in anti-poaching measures, the tourism authorities are only involved to a minor extent and most do not distribute information on poaching to tourists. Of the participating tour operators about 50% are funding anti-poaching initiatives and/or engaging in nature conservation projects.
- **The findings suggest that guidance and capacity building in developing consistent monitoring of protected area visitors and receipts and subsequently putting together a framework for the analysis of these data are needed. Moreover, the survey results suggest that there is potential for mobilizing the tourism sector in anti-poaching campaigns, which is significant in that the sector can play a key role in raising awareness and potentially financing (or co-financing) anti-poaching initiatives.**

### **Country: Indonesia**

**Project Title: "Sustainable Tourism through Energy Efficiency with Adaptation and Mitigation Measures in Pangandaran (STREAM)"**

**Duration: 1 January 2011 – 31 May 2014 / Reporting ongoing**

**Objectives:** To implement an approach to low carbon tourism development in Pangandaran by showcasing effective climate change mitigation and adaptation measures. STREAM serves as a lighthouse project to demonstrate the importance of holistic thinking and planning in the context of climate change and tourism, including the implementation of energy efficiency and renewable energy measures in tourism facilities, and the restoration of coastal ecosystem, as carbon sinks to enhance the adaptive capacity in Pangandaran.

#### **Results achieved as of 31/05/2014:**

- **Pilot interventions with Hotels and Restaurants:** 5 types of energy efficient and renewable energy technologies were implemented in 9 hotels and 2 restaurants. The pilot interventions consist of solar water heater, inverter technology air conditioning (AC) system, using hydrocarbon based AC refrigerant, LEDs and motion sensors. Together with management trainings on energy saving measures, the total annual energy is estimated to reduce 123 MWh per year, corresponding to 74 tons of GHG emission reduction.
- **Green Energy Concept (GEC) as new attraction:** As part of the vision to develop a new low carbon tourism attraction in Pangandaran, STREAM inaugurated the Community-based Green Energy Concept at Bulaksetra by showcasing the link of renewable energy to tourism development. Interventions included solar and wind powered tourism boat, lifeguard radio systems, lightings, information signage, among others.
- **Mangrove rehabilitation program:** 38,000 mangroves planted, 11,000 mangrove seedlings self-nurtured. It is estimated that at the end of 2013, 21 tons CO<sub>2</sub>eq carbon sink from the mangroves was captured, and at the end of 2014, approximately 53 tons CO<sub>2</sub>eq in total since the beginning (end of 2012) will be captured. The mangrove program has now more than 2000 people involved.
- **Mangrove Ambassador program:** 18 local schools integrated the mangrove programme to their curricular and educational studies, with more than 450 students as Mangrove Ambassadors. In the recent sessions of the Mangrove Ambassador program, most of the interpretation and facilitation have been taken over and done by local groups and teachers; STREAM expert team only maintained a distanced supervision. This is part of the handover operations from STREAM to the local community. Since the end of 2013 and throughout 2014, schools conducted their monitoring activities without financial support from STREAM.

- **Independent management of Mangrove Tours:** As a handover mechanism to local institutions, Babakan village government established an institutional council to manage and implement the mangrove programme. Ilalang is appointed as the local environment group to manage the mangrove area and handle the mangrove tours. These tours are currently fully managed by Ilalang; STREAM expert team only maintained close supervision or sometimes interpretation whenever necessary. More than 200 commercial tourists have participated in adopting their own mangroves. Mangrove Pangandaran social media program has 410 members and growing. As a product diversification of the mangrove tour, STREAM combined mangrove planting with bike tour through villages. 2 bamboo bike prototypes were constructed with participants from local community groups.
- **Coral reef rehabilitation:** Total of more than 1400 coral fragments were planted. 4 monitoring sessions were conducted jointly with BKSDA (Local government for environment), and the next monitoring will be done by BKSDA independently. Coral showed a survival rate of an average 94%.
- **Stimulating Behavior Change through Rewarding Concept:** STREAM inaugurated the pilot initiative to incentivize and encourage consumer towards environmental and climate friendly actions. The initiative explores how behavioral science positively influences and nudges guests through rewarding schemes that includes measure benefiting the locals.
- **STREAM Delivery Conference 5-7 May, 2014, Jakarta:** STREAM organized the Conference on Sustainable Tourism and Climate Change to deliver the achievements and approaches of the project for replication purposes, while also conducted forums and technical sessions on the linkages of climate change and tourism.

**Regional Project: China, Egypt, Germany, India, Kazakhstan, Republic of Korea, Senegal and Tanzania**

**Project Title: Sustainable Tourism along Migratory Bird Flyways**

**Duration: 1 June 2012 – 31 May 2014 (Preliminary Phase) / Reporting completed by December 2014**

**Objectives:** In 2012, a record one billion tourists crossed international borders, a true milestone in international travel and a clear sign of the strength of the tourism sector. The preliminary phase of the project had the objective to prepare the ground to develop a project proposal for a main phase of the project. The main phase would have the objective to channel the strength of tourism into a force for global biodiversity conservation and enhanced livelihoods for local communities by developing a network of sustainable and resilient destinations across four flyways: East Atlantic, West Asian East African, Central Asian, East Asian Australasian. Through the potential main phase of the project, tourism would be showcased as an innovative approach to promote the sustainable and resilient development of vital habitats for migratory birds. By providing an adequate framework for sustainable tourism management and diversifying the tourism offer along the flyways, the project would generate revenue for improved management of biodiversity and spread the benefits of tourism to local communities, while creating attractive experiences for tourists. The project would also contribute to the broader goals of sustainable development of the Convention on Biological Diversity (CBD), the Convention on Migratory Species (CMS), the Ramsar Convention and related Multilateral Environmental Agreements.

**Results achieved at 31/05/2014 (preliminary phase):**

- **Key partners** with sound experience in the field of conservation and tourism joined forces to implement the preliminary phase of the project. The Secretariat of the Convention on Migratory Species (UNEP/CMS), the Agreement on the Conservation of African – Eurasian Migratory Waterbirds (AEWA), Wetlands International, BirdLife International and the World Tourism Organization (UNWTO) acted as the implementing partners. UNWTO also ensured the overall coordination of activities. Additional partners with sound experience in conservation and tourism, such as the Secretariat of the Convention on Biological Diversity (SCBD), etc., were also involved.
- A set of criteria was developed for the **selection of sites** with the aim to ensure that the project would target sites with different specificities, and which are facing different threats, with a view to testing a variety of strategies and the following sites were preselected: in the East Atlantic Flyway, the Wadden Sea Biosphere Reserve – Schleswig Holstein (Germany) and the Djoudj National Bird Sanctuary

(Senegal); in the East Asian – West African Flyway, Ras Mohamed National Park (Egypt) and Lake Natron (Tanzania); in the Central Asian Flyway, Korgalzhyn State Nature Reserve (Kazakhstan) and Chilika Lake (India); and in the East Asian – Australasian Flyway, Seocheon and Geum River (Republic of Korea) and Chongming Dongtan Nature Reserve (China).

- A project specific **methodology** based on the User's Manual of the CBD Guidelines on Biodiversity and Tourism Development was developed to carry out the situation analysis of the project sites. It consists of desk research, consultation with stakeholders and formulation of recommendations and it was agreed by all partners during the 2<sup>nd</sup> Steering Committee meeting. The methodology was used for the formulation of eight **site reports** assessing the strengths, weaknesses, opportunities and risks of the destinations involved and identifying the specific tourism-related interventions that the project should target during its potential main phase in order to enhance tourism's contribution to their conservation and sustainable use while spreading the benefits to the local population, as well as to raise awareness of the importance and beauty of the key habitats they represent.
- The partners **showcased** the project in a variety of international events; leaflets and a logo were produced and a theme on tourism was selected for the celebration of the World Migratory Bird Day (WMBD). The celebrations of the WMBD included a photo story competition organized by CMS and AEWA in partnership with UNWTO which focused on raising awareness of the interactions and potential of the link between tourism and migratory birds. In addition, the results of the preliminary phase were showcased during a side-event celebrated within the framework of the eleventh Conference of the Parties of the CMS, which took place in Quito, Ecuador, in the month of November 2014.

**Project Title:** Improving Policies and Regulations to Support the Development of Markets in Tourism

**Duration:** September 2012 – February 2014 (Master Plan officially launched on World Tourism Day 2014)

**Objectives:** The Government of Uganda, in its National Development Plan 2010-2014, identified tourism as a priority sector to promote socio-economic development in the country, foster the creation of sustainable livelihoods, and generate greater dividends in foreign exchange earnings while contributing towards the protection of Uganda's valuable and diverse cultural and natural heritage. As a result of this Plan, the Ministry of Tourism, Wildlife and Antiquities was also created in 2011 to oversee tourism policy, planning, development and management in the country.

UNWTO, in collaboration with the United Nations Development Programme (UNDP), implemented a project which provides policy and strategic guidance for tourism development in the country through the formulation of a Tourism Policy and a Tourism Development Master Plan.

**Results achieved:** A Tourism Policy which provides a detailed overview of the tourism sector in Uganda; clearly defines the Government's development objectives through tourism; provides a vision for tourism in Uganda in 2024; and, provides policy guidance on how to achieve the vision and national development objectives through tourism in the disciplines of tourism management and regulation, tourism planning, product development and diversification, tourism infrastructure, protection and preservation of the natural and cultural heritages, tourism markets and marketing, tourism skills and training, and, financing of tourism activities.

Based on the Tourism Policy, a Tourism Development Master Plan was formulated to implement the Tourism Policy. The Master Plan was formally presented to the Government of Uganda in February 2014 and the official launch of the Master Plan, by the Government of Uganda, was held on World Tourism Day (27 September 2014).

### **Country: Uganda**

**Project Title:** Support for Development of Inclusive Markets for Tourism

**Duration:** September 2013 – December 2014

**Objectives:** The tourism sector is currently Uganda's fastest growing industry with an average annual growth rate of 21%. The vast majority of Uganda's poor live in rural areas and Uganda's main tourism products are also located in rural Uganda. The United Nations Development Programme (UNDP) is supporting the Government of Uganda through a project on development of inclusive markets in tourism, focusing on the participation of the poor and local communities in the tourism sector as entrepreneurs, employees and consumers. It aims to empower the poor to increase benefits from the tourism industry and improve their livelihoods through access to labor and markets, and increased opportunities for decent work and incomes.

The project has three main outputs: development and operationalization of market linkages; development and promotion of innovative pro-poor tourism products; and, capacity building of tourism business enterprises and selected tourism support institutions.

#### **Results achieved:**

- Identification for three priority tourism development areas in rural Uganda and key market actors from the tourism sector.
- Implementation of an innovative Business Development Service programme which combines fostering the creation of business linkages between tourism MSMEs in Uganda while providing specific capacity building to MSMEs in a vast array of business development services.
- Manual on innovative pro-poor business models which can be replicated in other parts of Uganda.
- Formulation of a strategic marketing action plan.
- Organization of familiarization trips: for Kampala-based tour operators to one of the project pilot areas to better understand the new tourism products and services which could be added to their tour packages; and, combined training programme and familiarization trip aimed at Ugandan media and travel writers to capacitate them to showcase the Ugandan tourism industry and to familiarize them with the new products which were being developed through the project.

Based on the success of the project, UNDP and UNWTO are currently in negotiations to extend the project in 2015.

## Anexo V. Protección de los turistas/consumidores y de los organizadores de viajes

### Introducción

1. The present annex follows the previous reports made to the 90<sup>th</sup>, 93<sup>rd</sup>, 94<sup>th</sup> and 95<sup>th</sup> sessions of the Executive Council and to the 19<sup>th</sup> and 20<sup>th</sup> sessions of the General Assembly on the same issue, recalling the insufficiency of existing binding rules at the global level governing the rights and obligations of tourists/consumers and tourism enterprises. It further refers to the corresponding decision, requesting that the UNWTO Secretary-General establishes an ad hoc working group able *“to define the scope and level of the proposed legal instrument”*.
2. The UNWTO Executive Council during its 95<sup>th</sup> session (Belgrade, Serbia, 27-29 May 2013) requested the UNWTO working group on the protection of tourists/consumers and travel organizers to continue the elaboration of the text of the convention and to send a report on its progress to the General Assembly.
3. Likewise, the General Assembly during its 20<sup>th</sup> session (Zambia/Zimbabwe, 24-29 August 2013) requested to continue with the elaboration of the text of the Convention and to convoke future necessary meetings, with the aim of presenting to the General Assembly, at its 21<sup>st</sup> session, a proposed text of the Convention to be approved.
4. The present annex summarizes the recent activities in this field since the last session of the Executive Council. The last version of the draft convention is enclosed for further comments and consideration by the Executive Council.

### Activities towards the adoption of an international convention on the protection of tourists and tourism service providers

5. The sixth meeting of the working group was held on the UNWTO Headquarters in November 2014 in Madrid. The working group continued the debate on the fourth draft text of the convention and agreed on some amendments. Subsequently, the fifth draft text of the Convention was sent in January 2015 to all Members of the Working Group for its comments. Therefore, the UNWTO Secretariat is in the process of collecting and compiling all the comments of the Members of the working group and elaborating the sixth draft.
6. UNWTO continues to cooperate with the European Union, ICAO and other international organizations in order to avoid inconsistencies and possible duplication of efforts, as well as to minimize conflict in related rules and regulations. In this sense, a bilateral consultation took place in UNWTO Headquarters on 10 September 2014 between IATA representatives and UNWTO Secretariat where IATA presented to UNWTO a set of core principles on consumer protection in areas linked to air transport matters. Likewise, UNWTO Secretariat also participated in the IFTTA (International Forum of Travel and Tourism Advocates) international World Conference held in Dublin, October 2014, in order to update and exchange knowledge on Consumer Protection.
7. The Executive Council was assured during the 94<sup>th</sup> session that the convention will be complementary to other instruments that are being elaborated by regional institutions, such as the European Union, among others. Following this mandate, the working group agreed during its last meeting in November 2014 on slightly discussing Annex II but not to come to any firm decision till the revision process of the Package Travel Directive is completed. Furthermore, a bilateral consultation took place on 12 September 2014 between the European Commission and the UNWTO Secretariat aimed at

discussing certain provisions of the new Package Travel Directive proposal in order to ensure consistency with the upcoming proposal for the revised Directive. UNWTO expressed its special support to the European Commission on continuing the revision process of the Package Travel Directive and modernizing the current regulatory framework taking into account the recent technological changes in the travel market.

### **Content elements of the draft convention**

8. The General part of the draft convention on the protection of tourists and tourism service providers introduces the general principles, the scope elements, the main definitions (such as tourist, tourism service provider) and the necessary international law related provisions (amendment rules, entry into force, reservations, signature, ratification rules, deposit etc.). Following the legal structure of the existing ICAO conventions, the Annexes of the convention will include standards as binding rules and recommended practices as non-binding rules. UNWTO reiterates its intention of not infringing on existing legal structures, either at the global or regional levels. On the subject of air transport, ICAO and IATA expressed their willingness to cooperate closely with UNWTO.

9. Annex I of the draft convention contains the assistance obligations of States Parties in force majeure situations indicating clear distinction from private sector's obligations (Annex II). It sets out the cooperation obligation between the host country and the country of origin of the tourist in case of force majeure and identifies the main important assistance elements which are required in such cases. Furthermore, certain provisions on providing available information on related national bodies responsible for such cases, on the facilitation of incoming staff's entrance, on set-up professional crisis management teams and on airport helpdesk services are added as best practices which should be followed by the States Parties.

10. Annex II deals with package travel issues in detail. It includes force majeure situations, when tourists need care and assistance but tourism service providers are neither liable for such cases (assistance obligation). In accordance with the existing regulatory frameworks minimum liability rules for non-performance and improper performance are inserted. Separate chapter deals with the minimum information which should be provided to the tourists before the conclusion of the package travel contract and the minimum content elements of the contract as well. Finally, in case of the insolvency of the service providers minimum rules are established for the protection of tourists (financial security).

11. Annex III on accommodation related provisions focuses on mainly information obligations, failure of performance or improper performance and assistance obligation in case of force majeure.

- e) Upon the request of the tourist providing information on alternative reservations and other or additional services which may be purchased by the tourist if such services had not been agreed in the package travel contract.

4.4. **Recommended Practice** - The host country should make immediate contact with the local representative or local agency of the other party to the package travel contract or where such local representatives do not exist, directly with the other party to the package travel contract involved in the force majeure situation in order to provide support to them.

“**Accommodation service provider**” means the tourism service provider or the natural or legal person who supplies or facilitates as an intermediary the provision of accommodation services;

“**Contract**” means the agreement linking the tourist to the accommodation service provider;

“**Force majeure**” means unusual, extraordinary and unforeseeable circumstances beyond the control of the accommodation service provider, that have resulted in the need of assistance on a large scale, when the consequences of those circumstances could not have been avoided if all due care had been exercised, or events which even with all due care could not have been foreseen or forestalled;

#### Chapter 2

##### *Information obligation*

2.1.1. **Standard.** States Parties shall take the necessary measures to ensure that, before the conclusion of the contract, the accommodation service provider (defined according to the laws and regulations of the States Parties) provides the tourist in any appropriate form with adequate information on:

- a) The identity of the accommodation service provider and the tourist;
- b) Services ordered and included in the contract;
- c) Periods of stay, dates, times;
- d) General terms and conditions;

2.2.2. **Recommended Practice** - States Parties should take the necessary measures to ensure that the contract includes elements referred to in 2.2.1 of this Chapter and the following additional elements:

- a) Check-in and Check-out time;

- c) Other provisions provided for under mutual agreement;

## **Chapter 3**

### **Failure of performance or improper performance**

3.1. **Standard.** States Parties shall take the necessary measures to ensure that the accommodation service provider is liable to the tourist for the proper performance of the obligations under the contract.

3.2. **Standard.** Where prior to the arrival of the tourist the accommodation service provider is aware that it will be unable to fulfil its obligations under the contract, the tourist shall be informed of this situation without delay and of any right to cancellation without penalty. The financial consequences of such failure on the contract with the tourist, in particular on possible compensations, shall be determined by the national contract law of the State Parties applicable in each case.

**3.3. Recommended Practices** - Where at the arrival of the tourist the accommodation service provider is not able to provide the services contracted, States Parties should take the necessary measures to ensure that the accommodation service provider provides the tourist, at no extra cost, with at least equivalent level of accommodation together with the means of transport to the new accommodation. **3.4. Recommended Practice** - Where a tourist fails to occupy a room for all or part of the contract period, the hotel should be entitled to claim up to the payment of the price agreed in the contract. States parties may request that the tourist does not pay for expenses saved as a result of the failure to occupy the room. The saved expenses can be calculated as a lump sum.

*[FOR DISCUSSION: HOTREC proposes this new reworded article as the original wording creates several issues concerning usual cancellation policies applied by hotels]*

**3.5. Recommended Practice** - States Parties should take the necessary measures to ensure that a commercial practice shall be regarded as misleading, and therefore prohibited if it contains false information and is therefore untruthful or in any way, including overall presentation, deceives or is likely to deceive the average tourist and causes or is likely to cause him to take a transactional decision that he would not have taken otherwise.

## Chapter 4

### *Assistance obligation in case of force majeure event*

**4.1. Recommended Practice** - States Parties should take the necessary measures to ensure that in case of force majeure the accommodation service provider cooperates with the relevant authorities of the tourists' country of origin and of the host country, providing:

- a) Information concerning tourist identity and location;
- b) The effect of the force majeure on the provider;
- c) Information of how aid might be offered;
- d) Information on state of health and well-being, information of how tourists might be contacted and removed from danger and repatriated.

**4.2. Recommended Practice** - States Parties should take the necessary measures to ensure that in case of force majeure, the accommodation service provider displays fair and ethical behaviour and should not increase the room rates for the sole reason of force majeure event for the extra nights spent by the tourists, and does not request cancellation fees neither from the tourists nor from other contracted tourism service providers.

*[FOR DISCUSSION: HOTREC proposes to discuss this article as the original wording creates two issues:*

- *The wording is too general and might be used to get free cancellation even when the consumer could perfectly reach the hotel without any problem*
- *The original wording favours one category of tourism service provider over another, despite the fact that there is no weak party to protect in B2B relations.]*

*HOTREC proposal:*

4.2. **Recommended Practice** - States Parties should take the necessary measures to ensure that in case of force majeure affecting the vicinity of the hotel, the accommodation service provider displays fair and ethical behaviour and should not increase the room rates for the sole reason of force majeure event for the extra nights spent by the tourist and does not request cancellation fees from the tourists.

4.3. **Recommended Practice** - The possible consequences of a force majeure event on the contract with the tourist, in particular on reimbursement or cancellation, should be determined by the national contract law applicable in each case.
