Mundial Solution

IN COMBAT
TO COVID-19

- Selected from 1183 solutions from 120 countries;
- Americas Vice Champion
Healing Solutions Tourism Challenge;
- **Only Start-up in Latin America**
among the Top 10 solutions.

Problems

COVID - 19

- **Difficulty tracking locations** frequented by people tested positive for COVID-19 in the period prior to diagnosis;
- **Impossibility of tracking people** who had contact with positive patients in the period prior to the onset of symptoms;
- **Insecurity feeling** of local population;
- Lack of automated technological tools to assist Health Surveillance and Health Departments;
- Lack of tools to help security maintenance for customers and employees in the reopening of establishments.

Solution

With Smart Tracking, we help solve most of the issues of identifying people with contact with infected people, making it **highly scalable**, offering a tracking system that **does not violate individual freedom**, at **no cost to establishments and users**, focused on **increasing the health-related safety**.

smart
tracking

Benefits

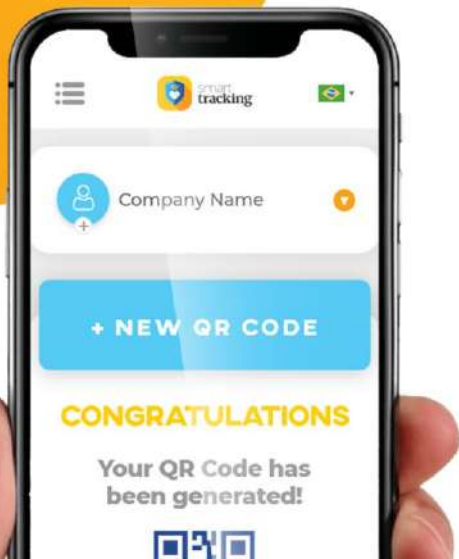

AND ADVANTAGES

- Meets WHO guidelines;
- Screening system that does **not violate individual freedom**;
- **Help in tracking contacts** of patients with COVID-19 up to 15 days in advance;
- Possibility to contact through email and phone with identified contacts;
- Up-to-date information on the health status of people who visit commercial establishments in the city;

Benefits

AND ADVANTAGES

- **Easy access** by the user through smartphone;
- **Does not require use of Apps**, uses QR Code;
- Establishments can also be notified;
- **Quick and easy deployment;**
- Terms of acceptance by the user and 100% protected sensitive data, in accordance with the **Data Protection Law**;
- Tracking is not restricted to the city, **the database is universal.**

EXCLUSIVE *advantages*

- **Avoid false alert** - Bluetooth signal goes through a wall and the virus does not;
- **Does not use geolocation** - maintaining individual privacy;
- **Universal Database** - does not require integration with several Apps;
- Anonymous data centralized in the competent authorities;
- Can be standardized for commercial establishment without hurting individual freedom;
- Avoids discriminatory acts, promoting greater adherence.

HOW IT *works?*

- Establishment performs registration on the platform, prints the generated QR Code and leaves it in sight for the customer;
- The customer reads the QR Code with the smartphone camera, performs the first registration and checks in the establishments wherever he / she passes, just reading the QR Code of the place.
- Health authorities tracking sites and people with whom patients tested positive for COVID-19 had contact within 15 days prior to diagnosis;
- Establishments and registered users receive the warning if they have been identified in the screening.
