

The following pages contain detailed tables on tourism related indicators such as international tourist arrivals, international tourism receipts and expenditure collected by UNWTO from national institutions, as well as the international tourism in the Balance of Payments

Tables reflect yearly data and monthly or quarterly data currently available. Most data are preliminary and may be subject to revision. See the Methodological Notes at the end of this annex for further information on the data.

The tables on the following pages are not included in the free extract of the UNWTO World Tourism Barometer. The full document is available in electronic format for sale and free for UNWTO members and subscribers through the UNWTO elibrary at:

- International Tourism Receipts in euro (Top 50)	A-9
- International Tourism Expenditure in US\$ (Top 50)	A-10
- International Tourism Expenditure in euro (Top 50)	A-11
- Detailed tables by UNWTO regions and subregions: International Tourist Arrivals and Tourism Receipts	
• Europe	A-12
• Asia and the Pacific	A-14
• Americas	A-16
• Africa	A-18
• Middle East	A-20
- International tourism in the Balance of Payments (BOP)	A-21
- Methodological Notes	A-22

Explanation of abbreviations and symbols used

- * = provisional figure or data
- | = change of series or methodology
- .. = figure or data not (yet) available
- n/a = not applicable

mn = million (1,000,000)

bn = billion (1,000,000,000) [note in Spanish 'miles de millones']

trn = trillion (1,000,000,000,000) [note in Spanish 'billones']

Q1: January, February, March

T1: From January to April

Q2: April, May, June

T2: From May to August

Q3: July, August, September

T3: From Sept. to December

Q4: October, November, December

H1: from January to June

H2: from July to December

YTD: Year-to-date refers to the change in the months with data available, compared to the same period of the previous year or of 2019. The (sub)regional totals are approximations for the whole (sub)region based on trends in countries for which data is available.

Series of International Tourist Arrivals

TF: International tourist arrivals (ITA) at frontiers (excluding same-day visitors);

THS: ITA at hotels and similar establishments;

TCE: ITA at collective tourism establishments;

VF: International visitor arrivals at frontiers (tourists and same-day visitors);

NHS: Nights of international tourists in hotels and similar establishments;

NCE: Nights of international tourists in collective tourism establishments.

n Shaded rank numbers indicate an upward movement in the destination's place in the ranking over 2019.

Series of International Tourism Receipts and Expenditure

All percentages are calculated from non-seasonally adjusted series in local currencies, unless otherwise indicated:

\$: in US dollars; **€** in euros; **sa:** seasonally-adjusted series.

For more on concepts, definitions and computation of data, please see the Methodological Notes on page A-22.

The World Tourism Organization (UNWTO) is the United Nations specialized agency mandated with the promotion of responsible, sustainable and universally accessible tourism.

UNWTO's membership includes 160 countries, 6 Associate Members, two Permanent Observers, and over 500 Affiliate Members representing the private sector, educational institutions, tourism associations and local tourism authorities.

About the *UNWTO World Tourism Barometer*

The *UNWTO World Tourism Barometer* is a publication of the World Tourism Organization (UNWTO) that monitors short-term tourism trends on a regular basis to provide global tourism stakeholders with up-to-date analysis on international tourism.

The information is updated several times a year and includes an analysis of the latest data on tourism destinations (inbound tourism) and source markets (outbound tourism). The Barometer also includes three times a year a Confidence Index based on the UNWTO Panel of Tourism Experts survey, which provides an evaluation of recent performance and short-term prospects on international tourism.

The UNWTO Secretariat wishes to express its gratitude to those who have contributed to the production of this *UNWTO World Tourism Barometer*, in particular to institutions that supplied data, and to the members of the UNWTO Panel of Tourism Experts for their valuable feedback and analysis.

This report was prepared by the **UNWTO Tourism Market Intelligence and Competitiveness Department**, under the supervision of Sandra Carvão, Director of the Department. Authors include (in alphabetical order): Fernando Alonso, Michel Julian and Javier Ruescas.

For more information including copies of previous issues, please visit: www.e-unwto.org/loi/wtobarometereng.

We welcome your comments and suggestions at barom@unwto.org.

Data collection for this issue was closed mid-November 2022.

The next issue of the *UNWTO World Tourism Barometer* is scheduled to be published on the occasion of the Spanish tourism fair Fitur (18-22 January 2023).

Methodological Notes

About the data

The monthly and quarterly statistics included in this issue have been compiled by the UNWTO Secretariat based on preliminary data reported by the institutions of the various countries and territories (e.g. National Tourism Authorities, Statistics Offices, Central Banks) through websites, news releases and bulletins, or provided through direct contacts with officials or through international organisations such as the Caribbean Tourism Organization (CTO), the European Travel Commission (ETC), Eurostat, the Pacific Asia Travel Association (PATA) or the South Pacific Tourism Organization (SPTO).

Information in this issue reflects data available at the time of publication. Data may be updated or revised without notice in future issues of the *UNWTO World Tourism Barometer* as it becomes available.

Countries that are not included, but which have monthly data at their disposal, are kindly requested to contact the UNWTO Secretariat at barom@unwto.org.

For major concepts, definitions and classifications in the measurement of tourism, please see the International Recommendations for Tourism Statistics 2008 (IRTS 2008) at www.unwto.org/methodology.

International Tourist Arrivals data

In the tables on International Tourist Arrivals for the various UNWTO regions, series are chosen that can serve as an indicator of trends in selected destinations.

The monthly series represented do not always coincide with the annual series usually reported for the various countries (e.g. visitor arrivals or nights instead of tourist arrivals) and sometimes only relate to a part of the total tourism flow (e.g. air traffic, specific entry points). See 'Explanation of abbreviations and symbols used' for more detailed information.

Regional and subregional totals are estimates by UNWTO based on the latest trends and available data for individual destinations.

Data on international tourist arrivals for France correspond to Metropolitan France.

Starting in the March 2021 issue, data on international tourist arrivals for the United Arab Emirates (UAE) corresponds to the entire UAE, not only Dubai.

Information provided by the Russian Federation includes statistical data for the Autonomous Republic of Crimea and the city of Sevastopol, Ukraine, temporarily occupied by the Russian Federation.

2022 percentage change data

Tables with monthly and quarterly data include percentage change figures for 2022 over 2019, as well as the usual year-on-year change (over 2021). This responds to the need to provide data that can be compared to the pre-pandemic levels of 2019, and not just to the unusually low levels of 2021, when tourism was impacted by the coronavirus pandemic. Some growth figures for 2022 may seem strong compared to 2021, but in fact are weak when compared to 2019. Percentage figures for some months and quarters are extremely high because they reflect the change over the same month in 2021 when international arrivals or receipts were very low. Therefore, growth figures above 1000% are excluded and marked with an arrow sign (↑).

Rankings

The country rankings shown in this Statistical Annex correspond to the year 2021. However, the ranking by international tourist arrivals is provisional due to missing data for 2021 from some large destinations.

International Tourism Receipts and Expenditure data

For destination countries, receipts from international tourism count as exports in the balance of payments (travel) of each country and cover all transactions related to the consumption of goods and services by international visitors, such as accommodation, food and drink, fuel, domestic transport, entertainment, shopping, etc.

They include transactions generated by same-day as well as overnight visitors. Receipts from same-day visitors can be substantial, especially in the case of neighbouring countries where shopping accounts for a large amount of spending by cross-border, same-day visitors.

International tourism receipts (travel) do not include receipts from international passenger transport contracted from companies outside the travellers' countries of residence, which are reported in a separate category (passenger transport).

For the (sub)regional totals, estimates are made by UNWTO for countries that have not yet reported results, based on the previous year's value and the trend for the (sub)region. Unlike arrivals, where revisions generally more or less balance out, receipts data tends to be revised upwards.

It should be noted that data as reflected by UNWTO on international tourism receipts and expenditure for China is based on the balance of payments (BOP) travel credit and debit (as with other countries for reasons of consistency and international comparability) reported by the State

international comparability) reported by the State Administration of Foreign Exchange (SAFE) at www.safe.gov.cn/en/BalanceofPayments/index.html.

In addition, according to the International Recommendations for Tourism Statistics 2008 (IRTS 2008), the balance of payments includes both business and personal purposes in the “travel” item. Business travel covers goods and services acquired by persons going abroad for all types of business activities. Personal travel covers goods and services acquired by persons going abroad for purposes other than business, such as vacations, participation in recreational and cultural activities, visits with friends and relations, pilgrimages, and education and health-related purposes. The “travel” item does not include international passenger transport, which is reported in a separate category in the BOP, under “transport”. For more information, please see the International Recommendations for Tourism Statistics 2008 (IRTS 2008) at: www.unwto.org/methodology and the IMF Balance of Payments and International Investment Position Manual (BPM6) at www.imf.org/external/pubs/ft/bop/2007/bopman6.htm.

It should also be noted that there is a difference in the data of UNWTO and those produced by the Ministry of Culture and Tourism of China (formerly the China National Tourism Administration) for 2014 and subsequent years.

Ranking of International Tourism Receipts and Expenditure

It should be noted that changes in the ranking of international tourism receipts not only reflect relative performance of the destinations, but also exchange rate fluctuations of the local currencies against the US dollar. Conversely, changes in the ranking of international tourism expenditure do not only reflect variations in spending on outbound travel, relative to other countries, but also changes in the value of the local currency compared to the US dollar.

In 2018 exchange rate movements were generally moderate, with the US dollar depreciating by 4% against the Euro. The US dollar-euro exchange rate moved from an average of 0.885 euro per US dollar in 2017 to 0.847 in 2018. Thus, the effect of converting tourism receipts earned in euros (by Euro area destinations) to US dollars was relatively small. The US dollar also depreciated by 3% against the UK pound and by 2% against the Chinese yuan and Japanese yen, among others. In these destinations tourism receipts expressed in US dollars were higher due to the exchange rates, though to a small extent. The US dollar however, did appreciate to different extents versus the currencies of large emerging markets, such as Brazil, Russia, and India, and quite sharply versus the Argentine peso due to the economic crisis in that country.

Exchange rates and inflation

With financial data measured in different currencies it is complicated to accurately determine variations in relative terms, as receipts have to be expressed in a common currency like the US dollar or the euro and generally are also reported at current prices, thus not taking account of exchange rate fluctuations and inflation. Exchange rate changes can substantially influence the values in US dollars reported from year to year. When the dollar appreciates against for instance the euro, worldwide receipts expressed in dollars relatively decrease, and vice versa in the case the dollar depreciates.

Exchange rate US\$ to euro and vice versa, average for the year

Year	USD to EUR	Change (%)	EUR to USD	Change (%)
2010	0.7543	5.2	1.3257	-5.0
2011	0.7184	-4.8	1.3920	5.0
2012	0.7783	8.3	1.2848	-7.7
2013	0.7530	-3.3	1.3281	3.4
2014	0.7527	0.0	1.3285	0.0
2015	0.9013	19.7	1.1095	-16.5
2016	0.9034	0.2	1.1069	-0.2
2017	0.8852	-2.0	1.1297	2.1
2018	0.8467	-4.3	1.1810	4.5
2019	0.8933	5.5	1.1195	-5.2
2020	0.8755	-2.0	1.1422	2.0
2021	0.8455	-3.4	1.1827	3.5

Note: Exchange rates are yearly averages. Source: Compiled from Eurostat

In order to account for exchange rate changes and inflation, international tourism receipts expressed in US dollar values (for reason of comparison) were converted back to the local currencies of each destination, weighted by the share in the total, and deflated by the relevant rate of inflation.
