Implementation of Expansion Strategy for the Affiliate Membership

The more quality companies join the Affiliate Members network worldwide, the greater chances to establish valuable partnerships and generate collaboration opportunities.

The value of public-private partnerships in tourism has become even more relevant in a context marked by the need to build a more resilient, sustainable, and responsible sector.

A key aspect of achieving greater diversification is to increase the number of newly incorporated Affiliate Members from underrepresented regions. Especially from countries that currently do not have any Affiliate Members from any region.

**Target Countries without Affiliate Members in the Middle East: Qatar, Oman and Kuwait**
The UNWTO / Affiliate Members Department seeks to establish a long-term prospect for the expansion of the Affiliate Members network based on:

**Quality Expansion:** focusing on incorporating new Affiliate Members that meet the eligibility criteria and with proven potential to bring value to the membership.

**Geographically balanced expansion:** priority on targeting countries underrepresented in terms of Affiliate Members, to achieve a more balanced distribution of Affiliate Members per region.

**Increased Membership value & prestige:** through a more qualitative interaction and dialogue of the Organization with each Member, which is key to meeting the expectations of the Affiliate Membership and consolidating the value of said membership.
Member States can request additional information about the status of the Affiliate Membership in their region to am@unwto.org, along with support from UNWTO through the Affiliate Members Department on how to promote the UNWTO Affiliate Membership in their own countries.
